

Application for Ownership and Prefix Assignment of Oocytes and Progeny of Leased Female (Fee \$100)

Normally, all offspring of a Registered Holstein® female are registered in the recorded ownership of the owner of that female and named using the owner's prefix. With completion of this form, indicating that the female identified herein has been leased for the purpose of obtaining oocytes and any resulting offspring, the owner is granting permission for offspring, born as a result of breeding said female on or after the lease date and prior to the termination of said lease, to be registered in the ownership of the lessee who submits the application for registration and each will be named using the prefix of that lessee. Similarly, any embryos produced during the leasing period will be recorded in the ownership of the lessee(s) and, if sold to other parties, standard Holstein Association rules for transfers of ownership of embryos and registration of resulting offspring will apply. The owner of the leased Registered Holstein female is responsible for notifying Holstein Association USA, Inc. of the date of lease termination.
